

IP-80 Current to Pressure Transducer

Complete, compact, and ready to install Current to Pressure Transducer assembly.

Versatility, accuracy, durability and ease of use. These are the things you look for in a current-to-pressure transducer, and that's exactly what you get in the MAGPOWR IP-80. Built into this compact, vibration- and shock-resistant industrial duty unit is an accurate, easy-to-read pressure gauge that monitors output pressure. The flexible IP-80 operates on normal filtered shop air and allows a wide variation in supply pressure, offers high flow and exhaust characteristics to insure rapid response of any clutch or brake and can be placed almost anywhere. The IP-80 includes the transducer, 20-psi reference regulator, dual reference air filters with automatic drains, air regulator and volume pressure booster.

Key Features

- Operates with any pneumatic clutch or brake regardless of make or size
- Compact size
- Complete and ready to install
- Pressure gauge for monitoring output pressure
- Dual air filters with automatic drain
- High flow and exhaust characteristics
- Rugged vibration and shock resistant industrial duty unit
